SUMMARY

Fourth-year BSIT student at Quezon City University seeking a Software Engineering internship. Has built and tested web and mobile applications with React, TypeScript, and React Native, integrated with Firebase and Supabase, in team projects, including leading one as project manager. Brings analytical problem-solving from QA testing and IT support, and is eager to learn modern development practices while delivering real business solutions.

TECHNICAL SKILLS

Software Development: React, TypeScript, JavaScript, HTML, CSS, React Native, PHP, Python, GitHub
Backend & Database: Supabase, Firebase, PostgreSQL, SQL, CRUD Operations, Authentication, Row Level Security (RLS)
Tools & OS: Visual Studio Code, Antigravity, Windows
IT Support: PC, Hardware and Printer Troubleshooting, Windows Installation, PC Setup, Software Installation, UPS Battery Replacement, QA Testing, Data Encoding, Basic IT Support

EXPERIENCE

IT Intern / OJT Trainee | Five Star Pangasinan Bus Co., Project 4, Quezon City — Sep 2026 – Present

- Conduct QA testing on company systems, identifying and reporting issues to support software quality and reliable operation.
- Diagnose and resolve PC, printer, and hardware faults, and keep workstations running through Windows installation, PC setup, software installation, and UPS battery replacement.
- Provide day-to-day IT support and accurate data encoding that keep office operations running smoothly.
- Analyzed the Gasman role and its processes to understand business operations and assess whether workflows align with potential system requirements.

PROJECT EXPERIENCE

Schatzies Events | Front-End Developer — 2025 – 2026

- Developed the front end of a company-specific CMS/web application as part of a development team, delivering the user interface for real business use.
- Built reusable web templates with React, TypeScript, and shadcn/ui components.
- Collaborated with another front-end developer to implement the user interface and website integration.

Technologies: React, TypeScript, shadcn/ui

QCU Time-in/Time-out Parking System | Project Manager / Backend Developer — 2025 – 2026

- Developed a mobile vehicle time-in/time-out system for Quezon City University using React Native and Firebase, storing vehicle entry and exit records.
- Implemented QR-code connectivity to retrieve and record registered student information, with role-based features for Guards, Students, Faculty, and Administrators.
- Led the team as project manager, setting development direction while contributing to backend and data integration.

Technologies: React Native, Firebase, QR Code, Visual Studio Code

Medicare | Backend Developer — 2025 – 2026

- Developed backend functionality for a dental clinic management system using Supabase and React.
- Implemented Supabase authentication and Row Level Security (RLS) to control access to application data.
- Integrated backend data with the React application, including database connectivity and user-side data operations.

Technologies: React, Supabase, Supabase Auth, PostgreSQL, RLS

EDUCATION

Bachelor of Science in Information Technology | Quezon City University, San Bartolome, Novaliches, Quezon City — Expected 2027
